Wife- Home maker

## **Summary (About Me)**

From my child hood days I were always a bright student till the age of 13. After I developed a psychological disease called Chronic Anxiety Disorder. I could not able to sit and concentrate in my board and university exams. My results were quite poor. For this I did not opt for higher studies after my graduation. Although I tried for some competitive exams, but it was the same situation as earlier. Finally, I visited some doctors and told them my issues and the disease were detected. In between I started some business and freelance work to keep me busy. I was fully cured at the age of 34. Then, I started my career in a full-time job.

## **Experiences**
