PROFESSIONAL SUMMARY

Passionate PHP developer with 6 years of experience, currently excelling in the Laravel framework. Skilled in developing dynamic, scalable web applications, with a understanding of MVC architecture and RESTful API development. Strong focus on clean code, performance optimization, and meeting project deadlines.

SKILLS

- Technical Languages – PHP, JavaScript
- Web Technology – HTML, CSS, jQuery
- Frameworks – CodeIgniter, Laravel

PROFESSIONAL EXPERIENCE

Technology Associate – PHP Developer | Fyntune Solutions Mumbai   January 2019 - Present
- Integrated third-party APIs into Health, Top-up, and Pet Insurance web applications.
- Engineered and constructed RESTful APIs using the Laravel PHP framework.
- Revamped and optimized existing systems to boost performance and enhance user experience.
- Designed and added new modules to expand functionality and meet specific business needs. Created tools to automate repetitive tasks and streamline workflows. Developed tools to automate repetitive tasks and streamline workflows.
- Diagnosed, tested, and debugged PHP applications through systematic analysis and debugging techniques.

PROJECTS

- **Health Demo 2.0**
    - Developed a digital insurance platform that empowers users to compare and purchase various insurance products on a single platform.
    - Seamlessly integrated APIs from leading insurance companies, including HDFC ERGO, Manipal Cigna, Tata AIG, Bajaj Allianz, and Aditya Birla, to facilitate comparison of top-up, health, and pet insurance products on one platform.
    - Engineered and deployed supportive tools and APIs, such as API whitelisting checks, transaction table views, IC API monitoring, trace ID retrieval, command runners, and table updates, to enhance the functionality and monitoring of the insurance application.
    - Live Project links: https://www.renewbuy.com/health/input/basic-details https://health-insurance.bajajcapitalinsurance.com

- **Admin Console**
    - Designed a centralized interface where admins can assign specific permissions to each user, enabling them to view and interact with data based on their access level.

- Integrated a navigation search in the admin console for quick and efficient data access.
- Curated and displayed network hospital data based on the latest updates from insurance companies.
- Developed control features for broker product displays and implemented share options.
- Live Project links: https://admin-console.heroinsurance.com/login
https://adminconsole.lifekaplan.com/login

- **Control Panel**
  - Architected CMS software that stores content in a structured database, facilitating easy retrieval and display across multiple digital platforms.
  - Contributed to the development and execution of a module that streamlines data modification for product features across multiple products, including commonly applied validation and underwriting policy alerts.
  - Live Project links: https://uatcontrol-panel.lifekaplan.com/login

- **Payment First Platform**
  - Contributed to the development of a tailored Care Health Insurance Prepayment product.
  - Engineered a seamless journey feature that automatically triggers email and SMS reminders to re-engage users if they drop out, boosting completion rates.
  - Live Project links: https://elephant.in/

- **Developed an Attendance Login Portal for Internal Office Use**
  - Crafted and deployed a custom attendance login portal, boosting the efficiency of attendance tracking and management within the organization.
  - Integrated role-based access control to ensure secure and appropriate system access.
  - Implemented real-time attendance logging, reporting features, and automated notifications to streamline HR processes.
  - Optimized the application for performance and scalability, enabling efficient handling of daily logins and data retrieval.

EDUCATION

Bachelor of Engineering in Information Technology
Sinhgad Lonavala Maharashtra   August 2012 - July 2015
